

# "Our Natural Gas Dodge Rams Have Been Outstanding."

"They're Proven, Reliable And Dependable ... And Save Us Money Two Ways!"

Dodge Ram Vans & Wagons have long been known for their rugged people- and cargo-hauling capabilities. But now there's one more reason to choose Ram Vans & Wagons: economical natural gas. Need proof? Listen to someone who runs them day-in and day-out.

*"You can hardly be more demanding on a vehicle than operating an around-the-clock airport shuttle service. We run natural gas Dodge Ram Wagons because they're proven, reliable and dependable. And they save us money two ways. First, our fuel costs have been cut dramatically – right now **we're saving about 65 cents per equivalent gallon!** And with each of our vehicles running 6000 miles per week, the savings add up fast. But we've also discovered savings on parts and service. Our natural gas wagons operate cleaner than gasoline wagons, so we've eliminated problems from bad gas and clogging filters. They run quieter and our customers don't experience gasoline exhaust. Right now about a third of our vehicles operate on natural gas, but our goal is to become a 100 percent natural gas fleet. And they're all going to be Dodge Rams."*

**Desmond Sandlin**
